DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding these claims, the use of the language "A paper processing device which includes [including]" (claims 1, 9, 10) coupled with the language "the paper processing device comprising:" renders the claims indefinite as it is unclear what features are part of the preamble, or part of the main claim body. Here, even though Applicant's remarks indicate that the claim body starts after "comprising:" it is still improper to use the language "including" or "which includes" at the beginning of the preamble as this language is transitional phrasing that is normally used to mark the start of the claim body, thus the later use of the additional transitional phrasing "comprising" leads to confusion when interpreting the claim. Examiner recommends replacing the confusing transitional phrasing so that the claim language itself clearly differentiates between the start of the preamble and the start of the main claim body.

Allowable Subject Matter

Claim 12 is allowed.

Claims 1-11 would be allowable if rewritten or amended to overcome the rejections under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Here, the feature of a sensor output abnormality detecting portion that detects an abnormal sensor status, wherein the sensor is cleaned by transfer of paper, and the sensor cleaning and the paper processing process are accomplished in parallel render the invention novel and non-obvious over the prior art.
